

# West Side Tractor Sales Opens New Facility in South Holland

SOUTH HOLLAND, IL – West Side Tractor Sales, the John Deere Construction and Forestry dealer for northern Illinois and Indiana, hosted a ribbon-cutting ceremony at the new South Holland, Illinois, facility. The new 25,200 square foot facility is located at 150 West 162nd Street, Route 6, just down the road from the old building. To accommodate the area's customer base, the new building features 10 shop service

bays equipped with state-of-the-art service tools and equipment, a 4,000 square foot parts department and warehouse, training facilities, and spacious and comfortable areas for West Side employees and customers.

The new building is especially symbolic because **Rich Benck**, the founder of West Side, worked for the previous Deere dealer as a technician at their South Holland store. Benck eventually purchased

the dealership from the previous ownership group. Fifty-two years, many expansions and three generations later, Benck helped design the new building.

This is a full-service facility offering new, used, rental, parts and service support to West Side customers.

West Side Tractor Sales is the authorized, full-service John Deere construction and forestry equipment distributor throughout northern Illinois, Indiana

and southwest Michigan. West Side Tractor Sales serves its customers through 10 full service, parts, rental and sales locations including Naperville, Rockford, Wauconda, South Holland and Rockdale, Illinois; and Indianapolis, South Bend, Fort Wayne, Lafayette and Bloomington, Indiana. ❖

The new South Holland facility located at 150 West 162nd Street, Route 6, South Holland, Illinois.
